Detailed Action

This is the first Office Action corresponding to original filing. Claims 1-21 have been cancelled per Applicant's amendment. Claims 22-44 have been added.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609 A(1) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

Receipt is acknowledged of Information Disclosure Statement, which has been reviewed by the Examiner.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the rough or profiled

Art Unit: 3632

surfaces (see claim 38) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Further, it is not clear if in Fig 4, reference numeral 3 is labeling the right element, or not. Please clarify.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Objections

Claim 22 makes reference to a "liquid container" but it should be - - beverage container - - which is how the container is defined. This correction should also be made in the other claims where the term liquid container is used.

Specification

The Abstract is objected to as referring to the wrong reference numeral. Element 21 is not the main body of the device but the wall of a glass.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

(a) TITLE OF THE INVENTION.

(b) CROSS-REFERENCE TO RELATED APPLICATIONS.

Art Unit: 3632

- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

The above titles are lacking. Correction is required.

Claim Rejections - 35 USC § 112

Claims 22-44 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The invention and how it does work are not clearly understood. In fig 2, the arrows M1 appear to show that clamping member 2 moves in the direction of the arrow

Art Unit: 3632

but when compare to Fig 3 and Fig 4, it appears that they move in the opposite direction. The specification states clamping members 2 and 3 as contacting the inner and outer sides, respectively of a glass. "Leave members" 11 and 12 are described as part of clamping member 13. However, claim 33 recites that the clamping member comprises third and fourth clamping members (are these elements 11 and 12?) formed on respective arms (4a, 4b?) of the first clamping surfaces. Fig 3 appears to illustrate this but Figs 1 and 4 appear to show them as separate members. It appears that a new figure, of the accessory holder (1) by itself, clearly showing the relationship of the clamping members may be necessary.

Claim 26 and 41 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 appears to include the same limitations of claim 25 (those after the clause "and/or"). The examiner suggests amending claim 25 by deleting everything after the "and/or" clause.

Claim 41 recites that the main body is outside the beverage container (liquid container) but part of said body stays inside the beverage container.

Conclusion

Because of the informalities explained above, no prior art is being applied against the claims. The examiner suggests to Applicant to review the whole application and provide whatever changes are necessary to clarify how the invention works. No new matter can be added.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Graham (1,237,504), Schultze (1,386,078), Ahlstrand (2,597,275), Schares (Re 246221), Hingston (3,298,206), Kaufman (3,754,502), Gaskill (5,823,483), Eastland, Jr. et al. (5,823,493) and Netherlands Pat No 8800568 show brackets attached to a receptacle holding an article.
